

20 Year Warranty

OB1*i*

Following the hugely successful TB2*i*, FB1*i* and PB1*i* signature series models PMC have been inundated with requests for further additions to the *i* series signature range. We are therefore proud to announce the release the OB1*i* signature. This limited edition signature model has all the cosmetic enhancements of the current signatures with fine adjustments of the already exemplary 24db per octave crossover network.

The OB1*i* - SIG displays all the ultra high definition and finesse of the current *i* series design with added refinement and transparency in the mid, vocal range. The key to this improvement is subtle tuning to the crossover network which has been carried out Peter Thomas himself - designer and founder of PMC.

Such is the confidence in build quality and engineering excellence the warranty period has been doubled to a lengthy 20 year period, which is something enjoyed by all the signature series.

The beautifully handcrafted British cabinets are finished in the distinct and rare Rose Palissandre veneer. A chic enhancement for any modern or traditional interior.

The exclusive, limited edition models include:

- PMC *ATL*™ (Advanced Transmission Line)
- PMC/SEAS®, 27mm SOLONEX™ soft dome tweeter, ferro fluid cooled
- 75mm / 3" Fabric soft dome midrange driver housed in a dedicated, isolated enclosure
- PMC designed 170mm Doped LF driver with cast magnesium chassis

# OB1*i* Signature Limited Edition Celebration Model

The OB1*i* signature utilises the meticulously engineered six and half inch bass unit, the professionally proven 75mm soft dome and the precision built SOLONEX™ domed tweeter which results in a vast, vivid audio picture and deep rich bass which can be experienced throughout the room. The OB1*i* signature's substantial ATL™ (Advanced Transmission Line) provides even greater bass extension and control than its smaller siblings and therefore has the ability to fill a larger listening room with ease.
